Fund Transaction Data Model — Entity Overview

PE) · Evergreen Fund (Semi-liquid / Open-ended) · Transfer Agency · Fund Admin · Custodian

any Key | FK = Foreign Key | Drawdown Only | Evergreen Only | Both Fund Types

Description	Related To
Master fund record. Defines type, structure, AUM, lifecycle status.	investor, fund_investor, transaction, investment
Investor/LP master record. Stores KYC, AML, accreditation status.	fund_investor, transaction, subscription, redemption
LP Register. Maps investors to funds. Tracks commitments, funded amounts, units held.	fund, investor, capital_call_detail, subscription, redemption
Central transaction hub. One row per transaction event across all types and fund types.	All tables
Capital call event. One call can span multiple LPs via capital_call_detail.	fund, transaction, capital_call_detail, investment
LP-level breakdown of each capital call. Tracks individual LP wire and funding status.	capital_call, fund_investor
Investor subscription record. Priced at NAV on dealing date.	fund, investor, nav_record, transaction
Investor redemption request. Subject to gate, lock-up, and liquidity review.	fund, investor, nav_record, transaction
Portfolio company investment record. Tracks entry, fair value, and exit.	fund, capital_call, distribution, valuation
Distribution event. Covers return of capital, income, gains, and carried interest.	fund, investment, transaction
NAV snapshot per dealing date. Prices subscriptions and redemptions.	fund, subscription, redemption, valuation
Fair value mark per investment per period. Feeds NAV and financial statements.	investment, nav_record
Regulatory filing record. Tracks due dates and submission status.	fund
Master list of all service providers (TA, Fund Admin, Custodian, Auditor).	fund
Immutable audit trail. Every status change on every transaction is recorded here.	transaction

Lifecycle — All Types & Fund Flows

transition. Read left-to-right: Status → Next Possible Statuses.

Trigger / Event	Responsible Party	SLA / Timing
GP Investment Committee approves deal, issues call notice	GP / Manager	Same day IC approval
Transfer Agent distributes call notices to LPs; 10-day wire window opens	Transfer Agent	T+0 from IC approval
Some LPs have wired; awaiting remaining	Fund Admin / Custodian	Within 10-day window
All LP wires received; capital confirmed by Custodian & Fund Admin	Custodian / Fund Admin	T+10 from issuance
One or more LPs fail to wire; default notice issued	Transfer Agent / GP	Post T+10 deadline
Called off prior to issuance or deal abort	GP / Manager	Pre-issuance only
Investor submits subscription form and KYC docs to Transfer Agent	Transfer Agent / Investor	T+0
TA performs AML/KYC/accreditation screening	Transfer Agent / Regulatory	T+1 to T+5
TA issues unit confirmation at dealing-date NAV; investor wires funds	Transfer Agent / Fund Admin	Dealing date NAV
Awaiting investor subscription wire to Custodian	Custodian / Fund Admin	T+2 from dealing date
Wire confirmed; units issued; GL booked	Fund Admin / Transfer Agent	Same day as wire confirm
KYC failed or investor ineligible	Transfer Agent / Regulatory	Within KYC review period
Investor submits redemption request form	Transfer Agent / Investor	T+0
TA checks lock-up expiry and eligibility	Transfer Agent / GP	T+1
GP reviews liquidity; determines if redemption can proceed or is gated	GP / Manager	Dealing date review
Redemption NAV calculated; units cancelled in register	Fund Admin / Transfer Agent	Post dealing date
Custodian instructed to wire redemption proceeds	Custodian	T+3 to T+5 post dealing
Wire confirmed; GL booked; investor notified	Fund Admin / Transfer Agent	Same day as wire confirm
Redemption queue per gate policy; next dealing date reviewed	GP / Manager	Per dealing calendar
Lock-up not expired or eligibility criteria not met	Transfer Agent / GP	Within eligibility review
GP identifies deal; preliminary diligence initiated	GP / Manager	Variable
Full IC memo prepared; Investment Committee vote	GP / Manager	1-4 weeks
IC approves; SPA negotiated; capital call issued (Drawdown) or NAV reflects (Evergreen)	GP / Manager / Legal	2-8 weeks
SPA signed; funds wired by Custodian; legal closing in progress	GP / Custodian / Fund Admin	1-4 weeks post SPA
Investment live in portfolio; regular fair value marks applied	GP / Fund Admin / Auditor	Ongoing
Partial realisation; remaining position still active	GP / Fund Admin	Post exit event
Full exit; proceeds received; distribution issued	GP / Custodian / Fund Admin	Post exit settlement
Investment written down to zero; loss crystallised	GP / Fund Admin / Auditor	Per valuation cycle
Exit proceeds received; GP initiates distribution	GP / Fund Admin	Post exit closing
Fund Admin calculates waterfall; preferred return, catch-up, and carry applied	Fund Admin	T+1 to T+5

GP approves waterfall; distribution notices sent to TA	GP / Manager	T+0 post approval
Custodian instructed; LP / investor wires initiated	Custodian / Transfer Agent	T+2 to T+5
All LP wires confirmed; GL entries booked	Fund Admin / Transfer Agent	Same day confirmation
Wire failure or LP bank issue; investigation opened	Custodian / Transfer Agent	Post failure event
Fund Admin initiates NAV calculation on dealing/period-end date	Fund Admin	Dealing date / month-end
Fair values applied; GAV / NAV / NAV per unit computed	Fund Admin	T+1 to T+3
Fund Admin and GP review and sign off on NAV	GP / Fund Admin	T+3 to T+5
NAV distributed to investors and used to price subscriptions / redemptions	Fund Admin / Transfer Agent	T+5
NAV confirmed; subscriptions / redemptions priced	Fund Admin	Post publication
External auditor validates annual NAV; opinion issued	External Auditor	Annual

redemption

management by GP.

Description	Constraints / Allowed Values
Unique redemption identifier	
FK → transaction (type=REDEMPTION)	
FK → fund	
FK → investor	
FK → nav_record used to price redemption	
Redemption lifecycle status	<i>GATE_REVIEW APPROVED WIRE_PENDING SETTLED GATED QUEUED REJECTED </i>
Date investor submitted redemption request	
NAV pricing date for this redemption	
Number of units requested for redemption (null if amount-based)	
Amount requested (converted to units at NAV if provided)	
NAV per unit on dealing date	
Actual units redeemed (may differ if gated)	
Gross redemption proceeds = units_redeemed × NAV per unit	
Date lock-up period expires for this investor	
Whether a gate was applied to this redemption	<i>TRUE FALSE</i>
Position in redemption queue if gated	
Date redemption proceeds were wired to investor	
Bank wire / SWIFT reference for redemption payment	
Record creation timestamp	
Last updated timestamp
