1. Drawdown Fund — Transaction Flow

A Drawdown (or closed-end) fund requires LPs to commit capital upfront. The GP issues capital calls as investments are identified, drawing down committed but unfunded capital on a deal-by-deal basis. Distributions are returned to LPs upon exit. The fund has a defined life (typically 10–12 years) with an investment period of 4–6 years.

2. Evergreen Fund — Transaction Flow

An Evergreen (open-ended or semi-liquid) fund accepts subscriptions on a recurring basis (monthly or quarterly) at NAV and allows periodic redemptions subject to gates and lock-up periods. Capital is continuously recycled — exit proceeds are redeployed rather than distributed. NAV is calculated regularly and acts as the pricing mechanism for both subscriptions and redemptions.

2.1 Swimlane Diagram

Subscription and Redemption phases can run concurrently with Ongoing Operations. The fund has no fixed end date.

	① Subscription	② Deployment	③ Ongoing Operations	④ Redemption
Investor	› Submits Subscription Form & KYC Docs › Wires Subscription Amount at NAV › Receives Unit / Share Confirmation	› Awaits deployment updates	› Receives Periodic NAV Statements › Receives Income Distributions (if applicable)	› Submits Redemption Request (subject to gate / lock-up) › Receives Redemption Proceeds at NAV
Transfer Agent	› KYC / AML / Accreditation / Suitability Check › Creates Investor Account in Share Register › Issues Shares / Units at Current NAV	› Updates pipeline if staged capital deployment	› Maintains Share Register › Processes Secondary Transfers › Distributes Investor Statements & Tax Docs	› Validates Gate / Lock-up Eligibility › Cancels Units — Updates Share Register › Sends Payment Instruction to Custodian
Fund Administrator	› Books Subscription in GL › Calculates NAV per Share (Subscription Date)	› Records Investment Cost / Portfolio Draw › Reconciles Cash Deployed vs. Subscribed	› Monthly / Quarterly NAV Calculation › Investor Capital Account Statements › Income Distribution Calculation › Liquidity Sleeve Monitoring › Annual Financial Statements for Audit	› Calculates Redemption NAV per Share › Books Redemption in GL › Issues Payment Instruction to Custodian
GP / Manager	› Sets Subscription Policy, NAV Frequency & Pricing › Defines Eligible Investor Criteria	› IC Approves Investments Continuously › Deploys Capital into PE / Credit Assets	› Manages Portfolio — Fair Value Marks (IPEV / ASC 820) › Manages Liquid Sleeve for Redemptions › Determines Gate / Side-pocket Triggers	› Approves / Gates Redemption Queue › Manages Liquidity to Fund Redemptions
Custodian / Bank	› Receives Investor Subscription Wire › Confirms Receipt to TA & Fund Admin	› Executes Investment Wires on GP Instruction	› Holds Fund Assets, Cash & Liquid Sleeve › Provides Cash & Position Reconciliation	› Wires Redemption Proceeds to Investor
Regulatory Bodies	› Fund Registration (40 Act / AIFMD / FCA) › Investor Suitability & Accreditation Rules	› Concentration / Leverage Limit Monitoring	› Form PF / ADV / AIFMD Annex IV Reporting › FATCA / CRS Annual Filing › NAV Valuation Policy Oversight	› Gate / Side-pocket Disclosure Requirements › Liquidity Risk Reporting (AIFMD Art. 16)

3. Key Participants & Roles

Participant	Role & Responsibilities
LP / Investor	Commits capital (drawdown) or subscribes at NAV (evergreen). Receives distributions or redemption proceeds. Reviews audited financials and regulatory filings.
Transfer Agent (TA)	Performs investor onboarding (KYC/AML), maintains the share / LP register, distributes capital call notices and investor statements, and executes payment instructions.
Fund Administrator	Maintains the fund's general ledger, calculates NAV, prepares financial statements, tracks portfolio valuations, and produces LP / investor capital account statements. Serves as the primary counterparty to the auditor.
GP / Manager	Makes all investment decisions via the Investment Committee, issues capital calls (drawdown) or sets subscription policy (evergreen), manages portfolio companies, determines fair value marks, and authorises distributions.
Custodian / Bank	Holds fund assets and cash, settles wires (subscription receipts, investment disbursements, distributions, redemption payments), and provides daily cash and position reconciliation to the Fund Admin.
Regulatory Bodies	Include the SEC (Form PF, ADV), FCA / ESMA (AIFMD Annex IV), tax authorities (FATCA / CRS), and any local regulators. The Fund Admin typically files on behalf of the fund.
External Auditor	Conducts annual financial statement audits (ASC 946 / IFRS 10), validates fair value methodology (ASC 820 / IPEV), reviews Fund Admin controls (SOC 1 / ISAE 3402), and issues the audit opinion distributed to investors.
